GANESH GOUD PADIMELA

Valparaiso, IN 46383 ♦ 2193160304 ♦ gpadimela@gmail.com ♦ LinkedIn

PROFESSIONAL SUMMARY -

• Dedicated Full Stack Developer with a diverse background spanning over six years in the Information Technology sector. Demonstrated success in collaborating with cross-functional teams to design, develop, and deploy scalable web applications. Adept at utilizing a broad spectrum of technologies, frameworks, and methodologies to deliver high-quality solutions. Proficient in Agile methodologies and committed to writing clean, efficient, and maintainable code while adhering to industry best practices. Skilled in conducting thorough code reviews, debugging, and troubleshooting to ensure application stability and quality.

SKILLS -

- Programming Languages & Frameworks: Java, JavaScript, HTML5, CSS3, Spring, Spring Boot, Hibernate, React.js, Angular, Redux, Bootstrap
- Database Technologies: SQL, PL/SQL, MongoDB
- Development Tools & Technologies: Eclipse, AWS, Docker, Jenkins, XML, JMS, SOAP
- Microservices & API Development:
 RESTful APIs, Microservices architecture
- Version Control & CI/CD: Git, Jenkins
- Other Technologies: Agile Methodology, NoSQL, Docker, JUnit

- Communication & Collaboration: Strong communication skills with the ability to collaborate effectively within crossfunctional teams and stakeholders.
- Problem-Solving & Analytical Thinking: Excellent analytical and problem-solving skills with strict attention to detail.

Adaptability & Continuous Learning: Ability to quickly adapt to new technologies and paradigms, with a commitment to continuous learning and professional development.

Full Stack Developer

10/2022 - Current

Abercrombie & Fitch Co – Columbus, OH

- Collaborating with cross-functional teams to design, develop, and deploy scalable web applications.
- Utilizing a wide range of technologies, including front-end frameworks (such as React.js or Angular) and back-end frameworks (such as Node.js or Spring Boot).

- Implementing responsive and user-friendly interfaces to enhance the overall user experience.
- Integrating third-party APIs and services to extend the functionality of the applications.
- Writing clean, efficient, and maintainable code while adhering to coding standards and best practices.
- Conducting code reviews, debugging, and troubleshooting to ensure the quality and stability of the applications.
- Participating in Agile development methodologies, including sprint planning, stand-up meetings, and retrospectives.

Environment: Java 8, spring, MVC, Spring Boot, Micro Services, RESTFul, Hibernate, HTML5, CSS3, JavaScript, React, REDUX, Eclipse, XML, JMS, AWS, Docker, EJB, Log4j, JUnit, Jenkins, SOAP, NoSQL, MongoDB, SQL, Agile and Windows.

Full Stack Developer 01/2021 - 09/2022

American Tower - Chicago, IL

- Developing and maintaining enterprise-grade software solutions using modern technologies and frameworks.
- Collaborating with product managers, designers, and other stakeholders to define requirements and translate them into technical specifications.
- Building RESTful APIs and microservices to support various functionalities of the applications.
- Designing and implementing database schemas, queries, and optimizations for efficient data storage and retrieval.
- Implementing security best practices, such as authentication, authorization, and data encryption, to protect sensitive information.
- Optimizing application performance and scalability to handle large volumes of traffic and users.
- Conducting unit tests, integration tests, and end-to-end tests to ensure the reliability and functionality of the applications.
- Participating in code reviews, sprint planning, and retrospective meetings as part of an Agile development team.

Environment: Java 8, spring, MVC, Spring Boot, Micro Services, Hibernate, RESTFul, HTML5, CSS3, JavaScript, Angular 4/2, Angular, Bootstrap, POJO, DAO, AWS, Docker, Jenkins, XML, EJB, Log4j, JUnit, SOAP, MongoDB, PL/SQL, SQL, Agile and Windows.

Java/J2EE Developer

06/2019 - 12/2020

Tampa General Hospital – Tampa, FL

- Developing and maintaining Java-based web applications and services to support healthcare operations and patient care.
- Designing and implementing software solutions that comply with industry standards and regulations, such as HIPAA.

- Collaborating with clinicians, administrators, and IT professionals to gather requirements and prioritize feature development.
- Integrating with electronic medical record (EMR) systems and other healthcare IT infrastructure to facilitate data exchange and interoperability.
- Implementing secure authentication and access controls to protect patient privacy and comply with regulatory requirements.
- Optimizing application performance and reliability through code refactoring, caching strategies, and database optimizations.
- Participating in on-call rotations and providing support for production systems as needed.

Environment: J2EE, spring, MVC, Spring Boot, Hibernate, Micro Services, XML, HTML5, CSS3, JavaScript, Angular, JMS, EJB, Log4j, JUnit, SOAP, SQL, PL/SQL, Agile and Windows.

Software Developer 08/2017 - 05/2019

Thomson Reuters – Hyderabad, India.

- Developing and maintaining custom software solutions for clients in various industries, including finance, retail, and manufacturing.
- Participating in the full software development lifecycle, from requirements gathering and analysis to design, development, testing, and deployment.
- Collaborating with clients and stakeholders to understand their business needs and translate them into technical requirements.
- Implementing software solutions using a variety of programming languages and technologies, including Java, C#, Python, and SQL.
- Designing and optimizing database schemas and queries for efficient data storage and retrieval.
- Conducting code reviews, unit tests, and integration tests to ensure the quality and reliability of the software.
- Providing technical support and troubleshooting assistance to clients during the implementation and maintenance phases.
- Contributing to the company's knowledge base through documentation, best practices, and lessons learned from projects.

Environment: Java, spring, MVC, Hibernate, Eclipse, DAO, XPath, XML, DOM, EJB, Log4j, JUnit, SQL and Windows.
